

Home Design & Astrology Questionnaire

This questionnaire helps me research the connection between a person's astrology chart and their personal preferences in home design.

Answer each question from your personal preferences as much as possible. I'm not looking for sensible or trendy responses - like what you would give your real-estate agent.

I'm looking for responses that truly resonates with you, with or without peer approval, mainstream appeal, practicality, or cultural inclinations, etc. There is no right or wrong answer, only what is true for you.

*** Indicates required question**
